

The key to protecting your investment is here. *KATS Coatings*[®] are designed to lock out contamination, while protecting the environment. We've got you covered.

4000 Series

KATS 4000 Series coatings use plant based polymers to provide protection for up to 12 months from rust and corrosion to ferrous and nonferrous materials. It may be applied with water compatible HVLP or conventional spray systems.

5000 Series

KATS 5000 Series coatings provide temporary protection for up to 12 months and protect painted and chrome surfaces from potential damage from bugs, bird droppings, acid rain, smoke, iron dust, railroad iron filings and other contaminants. Coatings may be applied with water compatible HVLP or conventional spray systems.

6000 Series

KATS 6000 Series coatings provide protection for up to 36 months. These products protect engine components, vehicle underbody metal sheeting, and all ferrous and nonferrous materials from rust, salt and corrosion. They may be applied with water compatible HVLP, airless, or conventional spray systems.

7000 Series

KATS 7000 Series coatings provide a durable casting sealant once uniform top coat has been applied. These coatings may be applied to carbon fiber, ferrous and nonferrous materials to seal porosities. Once applied by liquid flow coating or dipping, the substrate does not need any pressurization to set the sealant in the porous material.

8000 Series

KATS 8000 Series **removers** are concentrated forms of water based removers designed to remove our 5000 Series temporary coatings. These removers will not leave a residue on the surface once thoroughly rinsed with water. KATS 8077 Remover is biodegradable and environmentally safe.

9000 Series

KATS 9000 Series **peelable coatings** are designed using water based synthetic polymer that can be applied to smooth, non-porous surfaces and simply peeled off once dry. All KATS peelable coatings may be applied by water compatible airless sprayers or automatic spray systems to protect surfaces from minor nicks, scratches, abrasions, and any unwanted contaminants during transit or in completion of assembly during manufacturing.

Kwik Kleen

Kwik Kleen is a concentrated form of water based **cleaner** designed to remove grease, oil, tar and road grime. Once the product has been applied and allowed to soak, simply rinse with water. Kwik Kleen is used in the automotive, trucking, construction, agricultural, mining and manufacturing industries for cleaning and degreasing.

KATS Coatings® is an ISO 9001, TS 16949 and ISO 14001 certified manufacturer and worldwide distributor of water based protective coatings. We make environmentally friendly and fast drying coatings, cleaners and removers. Our complete line of water based protective coatings includes products for the Automotive, Trucking, Industrial, Mining, Construction, Railroad, Agricultural, Aerospace, RV and Manufacturing industries.

For more than 20 years, KATS Coatings® has grown its reputation for quality products and exceeding customer expectations.
