

THE KEY TO PROTECTING YOUR INVESTMENT IS HERE.

KATS Coatings® offers environmentally friendly and fast drying coatings, cleaners and removers. With a complete line of water-based products; KATS includes products for Automotive, Industrial, Mining, Construction, Railroad, Agricultural, Aviation and Manufacturing Industries.

For more than 25 years, KATS Coatings has exceeded customer expectations for quality products and service.

COATINGS

4000 Series

Use plant based polymers to provide protection from rust and corrosion to ferrous and nonferrous materials, for up to 12 months. KATS 4000 Series Coatings may be applied with water compatible HVLP or conventional spray systems.

5000 Series

Provides temporary protection for up to 12 months. KATS 5000 Series **Temporary** Coatings protect painted and chrome surfaces from potential damage from bugs, bird droppings, acid rain, smoke, iron dust, railroad iron filings and other contaminants. It may be applied with water compatible HVLP or conventional spray systems.

6000 Series

Provides protection for up to 36 months. KATS 6000 Series Coatings protect engine components, vehicle underbody metal sheeting, and all ferrous and nonferrous materials from rust, salt and corrosion. It may be applied with water compatible HVLP, airless, or conventional spray systems.

REMOVER

8000 Series

Concentrated forms of water-based removers designed to remove KATS 5000 Series temporary coatings. KATS 8000 Series Removers will not leave a residue on the surface once thoroughly rinsed with water. This effective remover is biodegradable and environmentally safe.

CLEANER & DEGREASER

Kwik Kleen

Concentrated, water-based cleaner and degreaser designed to remove grease, oil, tar and road grime. Once KATS Kwik Kleen has been applied and allowed to soak, simply rinse with water.

Kwik Kleen is commonly used in automotive- trucking, construction, agricultural, mining and manufacturing industries.
